

Eagle View A

Fall 2016

OUR CLASS WITH KIM PECK FROM LAUREL HILL STATE PARK.

WORKING HARD AND HAVING FUN!

In our classroom

We have had an exciting Fall in EVA studying trees while attending school events, having visitors, and doing experiments. Some of the visitors that we had were Molly the mouse and her friend from Molly's Matinee who talked about feelings, Kim Peck from Laurel Hill State Park, Smokey the Bear, and a Veteran on Veteran's Day where we looked at the different uniforms he wore throughout his time in the service. We conducted many science experiments including making moon sand, cup melting, volcanos, making play dough, pumpkin carving and painting, skittle experiment, and many more. We cooked a few times and have made pancakes, lemonade, black bean corn salad, and applesauce! We are looking forward to having more fun with our friends.
