

## **Summary**

The Community Action Partnership for Somerset County has conducted a comprehensive needs assessment for Somerset County between March 2015 and August 2015. The objective of this assessment was to identify the health and human services needs of the residents throughout Somerset County. The assessment was developed and overseen by a committee comprised of the Executive Director and Department Directors of CAPFSC. The goal of this project was to provide CAPFSC administration, board members, and staff objective data on specific community needs to help with strategic planning and resource allocation decisions

## **Methodology**

The survey utilized a random sample methodology. Participants represented all eleven school districts in Somerset County. The individuals surveyed are a diverse representation of our county's population. This included community members, community leaders, service providers and a large segment of direct service recipients. Data collection was conducted a multifaceted approach which included an online survey and a paper version which was later entered into a data base.

## **Results**

### **Demographics**

Approximately, 1054 surveys were collected over a two month period. Nearly 80% of the respondents were female. In terms of ethnicity/race, 97.6% of the respondents were White/Not Hispanic, 1.0% were Hispanic, and less than 1.0% reported Black, Native American, or Asian/Pacific Islander. The average age of respondents was 45 years old.

### **Family Composition**

The primary family composition for respondents was two-parent home/w kids (49.2%), (23.8%) two-adults/no kids, (14.4%) single parent and (7.8%) single person. Nearly 30% of respondents indicated having at least on child under the age of 5. Approximately, 87% of respondents reported having a school-aged child in the household.

### **Housing**

Nearly 73.2% of people owned their own home, while 20.44% rented and 5.14% lived with friends or relatives. In terms of housing type only 6.04% indicated that they lived in low income housing. On average, 83.89% of the respondents have not moved in the last two-years, with 9.97% having moved (1) time, and 4.33% moving (2) times.
